

Canning Adhesives

*A full line of labeling and tray forming glues from
CornerStone Adhesives.*

Can Labeling

HM 79	A hot-pick up adhesive designed to replace traditional gum rosen technology. Very clean machining and runs well at high speeds on all roll through labelers.	Amber	Chips	275 – 325 F
ST-600 HP	A white/clear hot pick-up adhesive used as a clear version of traditional gum-rosin based pick-up glues for roll-through labelers. Very clean machining.	White	Pastilles	275 – 325 F
HM 026	A white/clear pick-up adhesive for roll through labelers offering aggressive hot tack and better label adhesion.	White	Chips	275 – 325 F
HM 357	A clear drying semi-psa hot melt for roll through and vertical style labelers. Offers very aggressive hot tack and a permanent bond for label to can.	White	Pillows	275 – 325 F
HM 8558	A full pressure sensitive hot melt for vertical style labeling equipment such as Kronen. Offers very aggressive tack and clean machining.	Tan	Pillows	300 – 325 F
HM 8557	A water-white full pressure sensitive hot melt for vertical style labeling equipment such as Kronen. Offers excellent tack, clean machining, and dries clear.	White	Pillows	300 – 325 F
5078 L	A very fast setting water base adhesive used as an over-lap glue on roll through labelers. Glues paper – moderate coated labels.	White	Drum/ Tote	Cold
5010	A very fast setting water base adhesive used as an over-lap glue on roll through labelers. Glues paper – highly coated labels.	White	Drum/ Tote	Cold

Tray Forming

SB - 101	A fast setting EVA hot melt for tray forming and general purpose gluing. Good balance of cold and heat resistance.	Amber	Chips / Pellets	325 – 350 F
HM 077	A very fast setting EVA hot melt with additional hot tack. Offers tremendous bonding with improved heat resistance.	Amber	Chips / Pellets	350 F
PS - 501	A fast setting Metallocene hot melt offering no-char, better machinability, and reduced smoke/odor. Has great bonding ability and good cold/heat tolerance.	White	Chips / Pellets	325 – 350 F
PS - 522	A very fast setting Metallocene hot melt offering all of the benefits of Metallocene technology. Has excellent hot tack and improved heat and cold resistance.	White	Chips / Pellets	350 F

CornerStone

Adhesives & Packaging

“CornerStone specializes heavily in the food packaging market, particularly the canning industry. We have extensive experience technically supporting adhesives for Bear, Burt, New Way, and Kronos labeling equipment. We also bring technical value on all tray forming and case packing applications. CornerStone has the most diverse product offering of adhesives for Canning in the market, hands down, and we know how to support them.”

About us:

Barrett Tysinger - President

CornerStone Adhesives & Packaging LLC was founded to supply and support adhesive products to “every-size” manufacturers. Located strategically in the Upstate of SC, CornerStone is well positioned to supply industry leading products throughout the SouthEast, Mid-Atlantic, and Mid-West. By focusing heavily on technical analysis and support, coupled with an extensive supply of high-quality adhesives, CornerStone has the ability to recommend the best product for every industrial application.

Why choose CornerStone?

- Competitive Pricing
- Industry Leading Technology
- Value Added Technical Support
- Inventory Management Programs
- One-Two Day Lead Time
- Operator/Maintenance Training
- Extensive Lab Analysis Capability

Industries/Applications Served:

- | | | |
|-------------------------|--------------------|----------------------------|
| ➤ Case & Carton Sealing | ➤ Corrugated | ➤ Bag (multi-wall & paper) |
| ➤ Poultry / Beef | ➤ Folding Carton | ➤ Non-Wovens |
| ➤ Canning | ➤ Towel & Tissue | ➤ Automotive |
| ➤ Container Labeling | ➤ Paper Laminating | ➤ Assembly |
| ➤ Brewing | ➤ Tube & Core | ➤ Bookbinding |
| ➤ Pharmaceutical | ➤ Honeycomb | ➤ Tobacco |
